September 22

# City of Sutton Newsletter

Issue 46

September 2020

School is back in session. Watch for children crossing the road while loading or unloading the school bus. Please stop for the school bus to keep the children safe! Also watch for children at intersection crossings as they walk to school.

**Attention:**  
The amount charged each month for residential trash services will be increasing to \$18.25 per month. Extra toters will remain at \$3.00 per month. The new charge will be reflected on your September bill due October 26th, 2020.

## Community Center Covid-19 Forms Available at City Hall!

- ◆ Covid-19 Walking key holder agreement form  
Fob keys will be re-activated after agreement is completed and signed. Fob key agreement is **ONLY** for the key holder and members of their immediate family.
- ◆ Covid-19 Event & activities agreement form  
Agreement and required insurance must be provided prior to the event or activity. Access will not be granted until both are provided to City Hall.

Call (402) 773-4225 or stop by City Hall for more information.

# ENERGYWISE

Use less. Spend less. Do more.

Everyone knows that regular tune-ups to your heating & cooling systems and updating energy inefficient systems in your home saves you money on your utility bills, but did you know that it could also qualify you for Energy Wise rebates? A brief summary of current residential programs is listed below. See the October newsletter for available commercial programs.

### High Efficiency Heat Pumps

Residential customers who install a high efficiency heat pump (minimum 15 SEER & 8.5 HSPF) are eligible for an incentive of \$400 - \$3,300, depending on the efficiency. Or customers can choose a low interest loan (currently at 1.5%) through Nebraska Energy Office. Applications require submittal of an AHRI certificate for the heat pump system installed, which can be provided by the installing contractor.

### Low Interest Loan Program

NPPD has invested a total of \$1,000,000 since 2009 into the Nebraska Energy Office's Dollar and Energy Savings Loan Program. This investment allowed NPPD's wholesale utilities and retail customers to receive a 1.5% loan for selected technologies. In coordination with the wholesale utility working groups, high efficiency heat pumps were selected to qualify for the program.

### Attic Insulation

Residential customers who have 6" or less attic insulation and have electric heating systems as their primary source of home heating are eligible for an incentive of \$0.15 per sq. ft. if they add at least 6", or an additional R-19 of insulation to their attic space.

### Smart Thermostat

Residential customers can receive up to \$100 for installing a qualifying smart thermostat. Smart thermostats must be listed on the ENERGY STAR website.

### Cooling System Tune-Up

Residential customers are eligible for a \$30 incentive to have their cooling system tuned up by an HVAC contractor.

### Electric Vehicle Charging Station

A \$500 incentive is available for installing a residential electric vehicle charging station.

### Heat Pump Water Heater

A \$300 incentive is available for installing an air source heat pump water heater (EF>1.9) or water/ground source heat pump water heater (COP>2.8).

Some stipulations and restrictions apply. Contact City Hall at (402) 773-4225 for more details. Forms and program requirements can be found at
